

Case Study RMRU Reconstructed Analysis

Strong assets. Three questions leadership would still need answered.

Moonbow reconstructed the pre-pursuit public record to test whether an Institutional Proposal Maturity Baseline could identify consequential gaps before proposal activity accelerated.

The Public Record Showed A strong foundation was visible

Research Capability

Multi-investigator research and significant technical capability.

Infrastructure

Research facilities and institutional investment.

Collaboration

Cross-unit activity, joint appointments, and university-laboratory relationships.

Institutional Capacity

Evidence that consequential decisions could be made across organizational boundaries.

Three questions remained open

01

DECISION AUTHORITY

Who can make the call?

RMRU had technical assets, investments, cross-unit research and evidence that consequential decisions could be made.

The public record did not establish who could resolve cross-unit conflicts, approve institutional commitments, accept unresolved risk, or decide when the effort was ready to advance.

02

PARTNER COMMITMENT

When does interest become commitment?

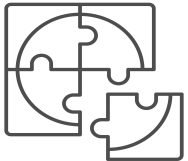

RMRU had external relationships, collaborative research, university-laboratory connections, and demonstrated ability to work across organization boundaries.

The public record did not establish how partner interest would become specific contributions, accepted dependencies, and institutionally authorized commitments for this pursuit.

03

INTEGRATION

How will the pieces fit together?

RMRU demonstrated cross-unit research, shared research facilities, joint appointments, and multi-investigator activity.

The public record did not establish how contributions from different units or institutions would be integrated for this specific effort.

WHAT MOONBOW DELIVERS

PROPOSAL MATURITY BASELINE

A focused assessment of one priority research pursuit.

EXECUTIVE FINDINGS

What is established, what remains unresolved, and which gaps matter most.

LEADERSHIP ACTION AGENDA

Owners, required actions, and a clear basis to advance, condition, reshape, defer, or stop.

ABOUT THIS CASE: RMRU is a reconstructed case based on public information from a completed research pursuit. Moonbow did not advise or assess the institution. "Not established" means not established in the public record reviewed, not that the condition did not exist internally.
